Course 14 — AI for Clinical Documentation & Patient Communication

Tier: 1 (Facilitator) · **Days:** 2 · **Cohort max:** 20 · **Ratio:** 1:20
Prerequisites: Clinical/nursing role.
Tools provisioned: LLM access, ambient-documentation demo account, patient-education templates.

Day 1 — Ambient documentation tools (AI scribes): how they work, limitations, patient consent; LLMs for patient education material (plain language, multilingual).
Day 2 — AI-assisted triage support tools (understanding, not replacing clinical judgment); identifying AI-generated misinformation; workflow integration and escalation protocols.

Capstone artifact: Documentation workflow + patient education sample.
Tutor certification: Tier 1 + clinical sign-off (domain reviewer approves content accuracy).
Kit-specific notes: All patient materials synthetic; escalation-protocol template mandatory.
