Course 25 — AI-Augmented UX Research & Interface Design

Tier: 2 (Practitioner-Tutor, domain: UX) · **Days:** 3 · **Cohort max:** 16 · **Ratio:** 1:16
Prerequisites: UX/UI design experience.
Tools provisioned: LLM access, wireframing tools (Galileo/Uizard/Figma AI), interview dataset.

Day 1 — AI for user research synthesis: interview analysis, persona generation from data; prompt design for insight extraction.
Day 2 — AI-assisted wireframing and prototyping; designing AI-native interfaces (chat, agents, confidence displays).
Day 3 — Capstone: redesign a flow with AI-augmented research and prototyping; present usability considerations for AI features.

Capstone artifact: Redesigned flow + research synthesis.
Tutor certification: Tier 2 (UX) + rubric calibration.
Kit-specific notes: Interview dataset synthetic; AI-native-interface pattern library supplied.
